

# BUSINESS GUIDE TO UNGA WEEK 2018

18-30 September

New York City

In September 2015, all 193 Member States of the United Nations adopted the 2030 Agenda for Sustainable Development — a plan of action for people, planet, peace and prosperity — with an essential role spelled out for business. Two years after the adoption of this Agenda and its 17 Sustainable Development Goals, the business community is being called upon to deliver greater action and impact. Many different events with a business focus or that welcome private sector participation are organized during and around

the 73rd regular session of the UN General Assembly (UNGA). The aim of this guide is to better coordinate business participation during UNGA week and bring private sector stakeholders to the table. Together, we can facilitate strong multi-stakeholder partnerships for the Global Goals and solve problems that no single organization or sector can address alone.
