Take Climate Action by
Setting a Science-Based
Target**

Chirag Gajjar is a Project Associate for India GHG Program, a part of WRI’s Climate Program, at the India Liaison Office in Mumbai. He works in the field of climate change mitigation. His areas of work include promotion of GHG inventories with corporations and small and medium organizations; capacity building, tool development, and mitigation goal setting through the India GHG Program.

Prior to WRI, he worked with the climate change division of Deloitte and Perry Johnson Registrars Carbon Emissions Services, Inc. He was primarily involved in GHG emission reductions projects and GHG inventory projects. His other areas of works included development of audit protocols for GHG emission reductions projects under various schemes. He holds a keen interest in developing tools to inventory GHG emissions.

Chirag holds Master’s and Bachelor’s Degree in Chemical Engineering from Gujarat University, India. His interests include playing cricket and theatre.
