Pathways to Low-Carbon &
Resilient Development**

Madhulika Sharma has over 24 years of experience of working in numerous profiles across Tata Steel – started as a System Trainee in the year 1992 in the Information Technology Services Department. After working for 10 years in Information Technology, she took a study break to complete one year Diploma in General Management from XLRI in 2002. After completion of her Executive MBA, she joined the corporate world as Executive Assistant to the then Dy Managing Director of Tata Steel. She also had the privilege to work as Executive Officer to ex-Managing Director of Tata Steel. During this period, she was actively involved in preparation and review of annual and long term Strategy Planning and deployment as well as the business risk assessment.

She then took over the challenging assignment of Chief Infrastructure Planning & Development for Tata Steel Works Jamshedpur in 2012 and made many visible changes inside the Steel Works at Jamshedpur. Under her leadership, the green cover inside Steel Works improved to more than double in a span of 4 years. She has now taken over as Chief of Corporate Sustainability of Tata Steel India. She is also a certified CII Assessor for Sustainability since 2014. She also represents Tata Steel in the “Sustainability Forum” of World Steel Association.

She is closely associated with women empowerment and gender diversity enhancement at Tata Steel as a Chairperson of SWATI a forum for women empowerment at Tata Steel. She also represents Tata Steel in the CII-Jharkhand Chapter’s taskforce on “women empowerment”.
